

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_47651
Title of the Manuscript:	DEMOCRATIC REPUBLICA OF CONGO MORINGA SEEDS OIL EXTRACTION, POTENTIAL MIGHTY ANTIPOISON
Type of Article:	Research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I wrote some suggestions in the attached document.	<p>Thank you for your contribution to improve the quality of our manuscript. It has been done (see yellow color).</p> <ul style="list-style-type: none"> - Some certain things you ask to suppress have been introduced to answer to the preoccupation of the other reviewers and they are satisfied. For example, in your second manuscript, lines 29-44; 63-69;193-198. There is risk to bend the meaning of the text. - The botanic description is very necessary in the eventual research of the reproducibility of results with the same species. - Concerning the objective, one sentence has been inserted (see lines 50,51 in yellow) to make it clear. - Origin (version 6.1, 8, 9.2, ...) is the software. It is an informatic program used in the world for statistic treatment of experimental data and for plotting graphics.
