

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_46206
Title of the Manuscript:	Physiochemical properties and identification of elite genotypes for improved sorghum breeding in Tanzania
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Thank you for efforts. However, the form of PCA presentation results is still the problem. Unfortunately, the change or reconsideration of methodology may be needed.	The authors appreciate the evaluators comment. However, since the objective of the trial was to identify sorghum genotypes based on the evaluated traits for improving sorghum breeding in Tanzania, and as this is an ongoing program, we feel that the current methodology and results are adequate for researchers and sorghum stakeholders to lean on as baseline. We thus request that the manuscript be published as at this stage or if the evaluator has more suggestions, we request for a baseline paper for our rehearsal.
