

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Advances in Mathematics and Computer Science</a>
Manuscript Number:	<b>Ms_JAMCS_43089</b>
Title of the Manuscript:	<b>MHD MAXWELL REACTIVE FLOW WITH VELOCITY SLIP OVER A STRETCHING SURFACE WITH PRESCRIBED HEAT FLUX IN THE PRESENCE OF THERMAL RADIATION IN A POROUS MEDIUM</b>
Type of the Article	<b>Original Research Article</b>

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments	This paper describes the heat and mass transfer of a MHD reactive flow of 10 an upper-convected Maxwell fluid model over a stretching surface subjected to a prescribed heat flux with velocity slip effect in a Darcian porous medium in the presence of thermal radiation and internal heat generation/absorption. The paper is reasonably well written and easy to understand it. The paper provides some insights into the reactive MHD Maxwell flow. This is why I recommend to accept as it.	Thank you for the acceptance.
