| Journal Name: | Journal of Engineering Research and Reports |
| Manuscript Number: | Ms_JERR_48250 |
| Title of the Manuscript: | Novel Characterizations of the JK Bistables (Flip Flops) |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | | |
| Minor REVISION comments | If It is a tutorial paper as described, then I would suggest that you add table to compare different flipflop and expand the characterization to different type of FF. You used JK flip flop which is based on D FF so I suggest that you do and show the model for that. | Thank you very much. We added a new paragraph to the comparison section together with four more references. |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
