

SDI Review Form 1.6

Journal Name:	Journal of Geography, Environment and Earth Science International
Manuscript Number:	Ms_JGEESI_47809
Title of the Manuscript:	Estimation of Geothermal gradient and heat flow for determination of geothermal energy sources in Monguno Area of northeastern Nigeria.
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	I enjoy updated and fluent study a lot. Firstly, I declare that milestone of this study is Section 4.2. Manuscript is very valuable area of geothermal energy sources in Nigeria. Manuscript is very useful in applications. Numerical calculations are true and very interesting. Figures and references are enough for this study. Also, I said that Abstract and introduction sections are not corresponding. I recommend that this paper can be accepted for possible publication in JGEESL.	I don't understand the reviewer's statement "Abstract and introduction sections are not corresponding." OR does he mean 'Abstract and introduction sections are corresponding'?

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
