EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
There are so many medicinal plants in this world, thus, I think it would be much better that the authors add " the logical thinking why they select these four medicinal plants" in the introduction parts.	The focus on the four plants stems from their common use in ethno pharmacology and as vegetables and spices in soups in the southern part of Nigeria. This has been so reflected in the manuscript.
