PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> • Need for a more explicitly fundamental and scholarly sound methodological details (if not including working framework) that unquestionably support the expected model development for better reliability and generalizability. • Likewise, provide additional structured discussions to further rationalize the true relevance of the "3 step" development model format vis-à-vis other proposed or existing models not only to mathematics education but also to education in general. • If possible, the model development involves empirical bases to complement the expressed theoretical underpinnings. 	<ul style="list-style-type: none"> • I do agree in part with the suggestion. The necessary changes has been made • The necessary changes has been made. • I do not agree
Minor REVISION comments	<ul style="list-style-type: none"> • For improved readability, provide all the necessary sections of the manuscript in consonance with the required publication format. 	I do not agree
Optional/General comments	<ul style="list-style-type: none"> • This article is interesting that after substantial revisions are made by the author, it is more than publishable. It is worth commending that the author has excellent command of the language and writing skills. 	I do agree
