Title of the Manuscript:	REPRODUCTIVE & BIOMARKER RESPONSE OF MALE ALBINO RATS (<i>Rattus norvegicus</i>) TO A DAILY DOSE OF SOFT DRINK (COCA-COLA)
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Ethics committees are needed wherever animal research is conducted. It is unacceptable to accept work that does not go through an ethics committee. The issue of the popular name of the drink is evidenced, is also characterized as being a problem for scientific dissemination. In these cases, the names of the active principle are always used.	This research proposal went through an ethics committee at the University level. The name of the research brand has been removed from the heading, the methodology, and the discussion section.
