

Journal Name:	<a href="#">Microbiology Research Journal International</a>
Manuscript Number:	Ms_MRJI_45679
Title of the Manuscript:	An Electron Microscopic Study of the Effect of (Saccharomyces cerevisiae) on the ability of E. coli O157:H7 to attach and efface healthy young broilers
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	I'd like to suggest that the author could discuss more about the protective effect of the baker yeast on the chick challenged with E. Coli O157:H7	Discussion addressing this point was included.
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	The present study evaluated the protective effect of baker yeast on chick challenged with Escherichia coli O157:H7. The pictures showed by this study demonstrated the effect of E. coli O157:H7 and also the protective effect by the baker yeast. I'd like to suggest that all table could be grouped in one only table. And I think that the discussion could be improved showing or discussing a little more about the protective effect related to baker yeast use in chick and not only compare with the results found by other authors	All tables were grouped in only one table as required. Discussion was amended by discussing the protective effect of the yeast.

PART 2:

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>  The study did not present the ethical authorization	It was included in the manuscript.
