<b>Compulsory</b> REVISION comments	they didn't use mytomicine-c at trabeculectomy cases in patients with POAG and PEG ages' (39-78) and (49-74) respectively . I think mytomicine-c needs for trabeculectomy success. it (Comparison of the Effect of Trabeculectomy in controlling intraocular pressure in Pseudoexfoliation and Primary Open Angle Glaucoma Patients) is available for Ophthalmology Research: An International Journal.	We of course performed trabeculectomies with Mitomycin C, however these are not included to our study. I also would like to emphasize that in some instances Mitomycin C is not available in our country
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
