

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_46207
Title of the Manuscript:	DFT-QSAR and Molecular Docking Studies on 1,2,3-Triazole-Dithiocarbamate Hybrids as Potential Anticancer Agents
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The revised version is greatly improved and much more readable. It appears to be scientifically valid and should be pharmacologically useful for the design of new anti-cancer drugs.</p> <p>There are still some spelling and formatting errors that can be corrected prior to publication, but, these remaining errors are trivial.</p> <p>The four human-origin cell lines used in the study should be clearly defined in the text: MGC-803 (gastric cancer; defined in the Abstract, but not in main text), MCF-7 (breast cancer), PC-3 (prostate cancer) and EC-109 (esophageal cancer).</p>	<p>Thank you for your comments</p> <p>We have added the necessary information in the revised manuscript</p>
