Editor's comments

I'm sending my opinion and remarks regarding the attached paper lease, include them in the format of the final reviewing table.

1. The title: Economic Development and Social Development in the case of Sri Lanka

2. The methodology is correct to be placed after the literature review.

3. Of course, the sources for fig. 1 and 4.

4. The final chapter (5) to be entitled Conclusions and Recommendations and it is necessary to see what is happening from now on with the Government policies, especially in the social field, with the need for more and effective FDI and so on....

5.A quick revision of possible misspellings, maybe failure in expressions (for a better understanding).- some aspects are underlined with red..
