

SDI Review Form 1.6

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_39933
Title of the Manuscript:	POTENTIAL USE OF HIBISCUS ASPER (RAMAN KOGI) FIBRE AS OIL SORBENT
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p>	<p>The work is interesting but I have the following suggestions.</p> <ol style="list-style-type: none"> 1. English should be improved throughout the manuscript. 2. Quantitative information should be provided in the abstract. 3. The conclusion should be concise and to the points indicating the application of the work. 4. Refs are not updated and the following refs. should be added: <p>A: With ref (Nwilo and Badeje, 2001).</p> <p>Instrumental methods in metal ions speciation: Chromatography, Capillary Electrophoresis and Electrochemistry, Taylor & Francis Ltd., New York, USA (2006), ISBN: 0-8493-3736-4.</p> <p>Nano Chromatography and Capillary Electrophoresis: Pharmaceutical and Environmental Analyses, Wiley & Sons, Hoboken, USA (2009), ISBN: 978-0-470-17851-5.</p> <p>Environmental water: Advances in treatment, remediation and recycling, Elsevier, The Netherlands, (2012).</p> <p>B: after methods of development with or without catalyst have been developed. At line 37</p> <ul style="list-style-type: none"> - Artificial neural network modelling of amido black dye sorption on iron composite nano material: Kinetics and thermodynamics studies, J. Mol. Liq., 250: 1-8 (2018). - Uptake of propranolol on ionic liquid iron nanocomposite adsorbent: Kinetic, thermodynamics and mechanism of adsorption, J. Mol. Liq, 236: 205-203 (2017). - Molecular uptake of congo red dye from water on iron composite nano particles, J. Mol. Liq., 224: 171-176 (2016). - Green synthesis of functionalized iron nano particles and molecular liquid phase adsorption of ametryn from water, J. Mol. Liq., 221: 1168-1174 (2016). - Synthesis of composite iron nano adsorbent and removal of ibuprofen drug residue from water, J. Mol. Liq., 219: 858-864 (2016). <p>C: After They were observed to be excellent oil sorbents because of their hydrophobic and oleophilic character. At line 41.</p>
