General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link: (<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The results and discussion sections should be revised into normal prose for improved readability. They currently read more like a bulleted list.</p> <p>The data in figure 3 a-c would be presented in another form. The current presentation does not give the best explanation of the data. I would suggest a table.</p> <p>There are duplicate figure numbers for figures 1, 2 and 3. All figures must be numbered sequentially</p> <p>The conditions for the atomic absorption instrument are not presented in the paper, the authors should include lamp type, wavelength, flame type, etc. I would also like to see the experimental detection limits for their conditions.</p> <p>The dissolution conditions are given for both soil and plants. How do these conditions compare with ASTM standard methods?</p>	
Minor REVISION comments		
Optional/General comments	The authors have stated this is a review article. It appears to be original research more than a review.	

PART 2:
