

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

Journal Name:	<a href="#">Asian Journal of Applied Chemistry Research</a>
Manuscript Number:	<b>Ms_AJACR_46163</b>
Title of the Manuscript:	<b>An ultra-trace Quantification of Poly Aromatic Hydro carbons using Selected Ion Monitoring Gas Chromatography Mass Spectrometry in Sarawak, Mambong River</b>
New title:	<b>Application of Selected Ion Monitoring -Gas Chromatography Mass Spectrometry (SIM-GCMS) for quantification of Poly Aromatic Hydro carbons in surface water from Sarawak, Mambong River (Malaysia)</b>
Type of Article:	<b>Original Research Article</b>

### PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The authors have not addressed the following comments yet:</p> <p>The manuscript's abstract needs to be thoroughly revised. The scope of the study must be properly highlighted.</p> <p>Author(s) need to advice similar papers in order to improve the overall presentation of their work.</p> <p>The Introduction section of the manuscript requires extensive revision. The authors need to expand the review of literature that is relevant to their study. The aim of the study needs to be properly highlighted and justified.</p> <p>Results are not presented properly. Mainly, it is because the presentation of results lacks any description, author(s) only show tables.</p> <p>Validation of method must be fully showed by an extensive analysis of figures of merit such as selectivity, linearity, limit of detection, limit of quantitation, etc. Although, some of those parameters were mentioned on document, experimental evidence is not presented and discussed properly.</p>	

### Reviewer Details:

Name:	<b>Mario Alfonso Murillo Tovar</b>
Department, University & Country	<b>Centro de Investigaciones Químicas, Universities Allied for Essential Medicines, Mexico</b>
