PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>2: IBAPARA = IBARAPA</p> <p>5,6: Study time should be included (e.g. January to June 2017)</p> <p>19-21: there is no link between 1st and 2nd sentence. It is better to have an intermediate sentence to link the climate change and ocean.</p> <p>48: Data collection and analysis should be two different parts. Are those data collected via personal interview?</p> <p>72: Ifejika <i>et al</i> (2007) is missing in the main ref. list.</p> <p>74: Dey <i>et al.</i> (2002) is missing in the main ref. list.</p> <p>75: Bolorunduro (2003) and Ifejika (2006)</p> <p>82: Agwu and Anyanwu (1996)</p> <p>86: Igben (1988)</p> <p>115: Ifejika <i>et al.</i> (2007)</p> <p>125: Nzeadike <i>et al.</i> (2011), this spelling is not same that in main ref. list.</p> <p>207: Don't know much = Very less</p> <p>208: Know little = Less</p> <p>209: Reasonable extent = Reasonable</p> <p>210: Great extent = High</p> <p>238: Conclusion should be clear.</p> <p>246: A lot of problems in references in consistency of format. Follow specific format for each reference.</p> <p>247, 280, 286, 292, 312, 317: These ref. is not found in writing parts.</p> <p>Remarks</p> <ul style="list-style-type: none"> • Title and objectives are not fit with the results and discussion. It is better to change the title towards socio-economic and problems are felt by the farmers in aquaculture in selected area. Because, the author emphasised on climate but included much other socio-economic data. • Writing pattern and English should be checked intensively.
