PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. The theoretical model is not strictly derived, and also not relevant to the topic, nor is related to empirical analysis. 2. Econometric specification includes too many variables, which are not well addressed. Besides, agricultural output and GDP may be seriously correlated in the equation, thus simple regression may not be appropriate. It is also suggested to derive the econometric model carefully, which is one of main tasks of the paper. 3. For discussions of empirical results, statistical theories are not needed to state in details. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1. The paper has a lot of grammatical problems, and many sentences are not well-written and even incorrect grammatically, but also the word uses are not proper in many places. 2. Grammatical errors are specified in the revised version of the manuscript, which is attached afterwards. 	
Optional/General comments	Generally, the paper is not well focused on the main theme, whether is "the impact of agricultural financing on economic growth" or "impact of agricultural output on economic growth". It is recommended to choose one or the other, but to clearly specify in the title, and be consistent with the contents of what the paper is stated.
