Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper raised lots of critical and current issues regarding the subject matter which is very good. However, several references are missing. Many sentences with figures and numbers which shows percentages are left without references. This is a serious problem considering the paper is a review.</p> <p>Some of the arguments lack evidence based examples this has to be addressed.</p> <p>Even if it is a review paper, still the author needs to explain the methodology he/she used to prepare this review paper. For example, what are the main sources of the literature? Books, documents from different government offices, published papers.... It has to be included in the methodology part.</p> <p>Abbreviated words needs to be written in full when using at the first time.</p> <p>Some words are used in capital letters in the middle of a sentence this needs to be corrected.</p> <p>I included my comments in the document which the author needs to include.</p>	
Minor REVISION comments		
Optional/General comments
