PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> The title should be modified to "Effectiveness of Growth Enhancement Support Scheme (GESS) in Input Delivery in Southwest Nigeria. Reason being that effectiveness is the dependent variable in the study and also constraint is already a specific objective. The weighted mean score of the constraints should be generated and used to discuss the result instead of the ranking. The tables should be collapsed into one. The recommendation on constraints faced is not sharp enough. A recommendation should be an action plan or statement of solution directed to a stakeholder or individual or institution. The specific objective 4 should serve as the broad objective only. 	
Minor REVISION comments	<ol style="list-style-type: none"> The summary of the recommendation should be captured in the abstract. Stating the mean of "functional mobile phone ownership" is not necessary since it is measured at nominal level 	
Optional/General comments
