

**SDI FINAL**

**PART 1:**

Journal Name:	<a href="#">Asian Journal of Agricultural Extension, Economics &amp; Sociology</a>
Manuscript Number:	Ms_AJAEES_46730
Title of the Manuscript:	Time Series Analysis and Forecasting of Oilseeds Production in India – An Application of ARIMA and GMDH-Neural Network
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Autour has incorporated all the suggestion. However, I am not sure, why author is not able to convert the unit [i.e thousand tonnes to lakh tonnes]. Reading 30062 thousand tonnes won't looks sound.</p> <p>Autour has stated that "the output here is GMDH shell Ds Software oriented, hence there is no t-value". I am aware of that GMDH shell won't provide the t-value. What I suggested is, it is good if autour can calculate the t-value manually.</p> <p>Anyhow, these are minor changes. It is upto editor, weather he wants to incorporate or not.</p>
