**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Nice topic selection. However, there are a few modifications that can be made:</p> <ol style="list-style-type: none"> <li>1. It is important to include the "key words" section right after the abstract to enable your leadership to know the exact terminologies you are looking at in the rest of the paper</li> <li>2. Much of the information given in the first few sentences of the introduction are not cited.</li> <li>3. Please check the referencing style</li> <li>4. This is a very interesting imperial analysis, but we noted that most of the figures in the results tables are unclear.</li> <li>5. What approach did the researcher use to determine the sample used for this research?</li> <li>6. It would help to have a section in the literature review that talks about this topic at globally. This will enable the readers of the paper to understand a little more about the topic.</li> </ol>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
