PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The research, although simple, deals with a current issue. However, I believe that research should be enriched by explaining the statistical methods used to make the necessary comparisons. In addition, I think that the discussion of the work is poor and I suggest that it can be enriched by comparing similar results reported by other African authors or obtained in other parts of the world as well as comparing the results with other standards and not only with CEC. The aspects that must be corrected or extended are indicated in the manuscript.	
Minor REVISION comments		
Optional/General comments		

PART 2:
