PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper provides important information on technologies to maintain crop productivity and protect the environment</p> <p>The objective of work is clear and precise. The materials and methods are very well described and in a very complete and detailed way. It only remains to indicate the experimental design, number of repetitions and method of statistical analysis. The results of the different treatments on the growth of the different parts of the corn plant, are not analyzed statistically only the average value and the standard error are presented. It is expressed which treatment has the greatest effect on the growth of a plant organ without knowing if the differences are statistically significant.</p>	
Minor REVISION comments	<p>The statistical analysis of the results, improves the scientific rigor of the research and allows to clearly establish the differences between treatment and that the discussion and conclusions have more force</p>	
Optional/General comments
