PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Cfu should be CFU (colony forming unit). 2.2 Indoor air sampling In this section the authors used only setting plate method and no air sampler method, which is more quantitative meethod, was not used, therefore this study is quantitatively poor. As you know setting method is influenced by air flow, therefore the data is not quantitatively discussed. This paper needs to carry out air samplers for quantitative analysis. This paper has no originality in terms of quantitative analysis and identification in addition to lack of air sampler studies. At least air sampler study will be further required.
