PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No major revision comment	
Minor REVISION comments	<p>1. In line 14 of the Abstract, replace the word "acceptance" by "non-rejection". Another option is to replace the phrase "acceptance of the null hypothesis" by "failure of rejecting the null hypothesis". The word "accept" is no longer use as a decision for null hypothesis. The decision is either "reject" or "fail to reject".</p> <p>2. The symbol use for Pearson correlation is "r". Replace "t" in lines 12 and 14 of the Abstract by "r", that is "r = .443" and "r = .369" for line 12 and 14, respectively. The p-value should also be written without "0" before the decimal point, that is "p = .004" (line 13) and "p = .019" (line 14). Do the same corrections for the results and discussion in page 9 and the conclusions in pages 10-11.</p> <p>3. Further, use "R" instead of "r" for coefficient of correlation and "R²" instead of "r²" for coefficient of determination in page 9 and page 11.</p> <p>4. All references cited in the text should be included in the list of references at the end of the paper. In particular, the following references should be included: Jose et al. 1996 (cited in line 189; and Gill et al. 2010 (cited in line 206).</p>
