

SDI Review Form 1.6

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_45764
Title of the Manuscript:	A Transmuted Lomax-Exponential Distribution: Properties and Applications
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. The mathematical expressions in the paper must be improved, there are many inconsistencies that difficult the reading. I recommend using the same equation editor to write math expressions.</p> <p>2. The figures are so poor, the author must include clear figures and be careful with the dimensions, legends, and colors.</p> <p>3. The application must be improved. A plot density for the remission time could help the reader to understand the variable behavior. The null hypothesis for the 3 test must be included. It is better to unify the results in table 6.2, using P-values is the usual way to report test results. Please include a quantile-quantile plot for the TLED distribution to show the fitted model.</p> <p>4. I suggest to include an URL with the R codes used in the paper to help the reader replicate the application. The GitHub free service can be used to this.</p>	
Minor REVISION comments	Other minor comments are in the revised paper (in pdf format) to help the authors improve the document.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
