PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Please delete the numbers related to your statistical analysis from the abstract.</p> <p>Please structure the literature review section with the subtitles of the variables you studied on and refer the relationships you analysed. Add more resources to this section from the recent research related to the proposed relationships.</p> <p>Purposive sampling approach was used to select the participants. It is a serious limitation on the generalizability of the findings of this study and it should be addressed at the end of the paper as a limitation.</p> <p>Linear regression analysis was performed. However, there is not any explanation that the data set meets the assumptions of linear regression. Please give necessary information at the methodology section.</p> <p>At the discussion section, discuss the findings more deeply, comparing your findings with the findings of recent research.</p> <p>At the conclusion section, write more implications (both theoretical and practical).</p>
