<b>Compulsory</b> REVISION comments	<p>The manuscript entitled " Agricultural adaptation options against adverse effect of climate change in Shyamnagar upazila of Satkhira district, Bangladesh" is very important and useful in the field of climate change. Climate is the longstanding average weather of an area. It characterizes a region's general weather patterns that happen over the course of many years. The United Nations Framework Convention on Climate Change (UNFCCC) defines climate change as a change of climate which is attributed directly or indirectly to human activity that alters the composition of the global atmosphere and which is in addition to natural climate variability observed over comparable time periods. The climate has already changed significantly over the last 30 years</p> <p>Actually, the manuscript need more up to date of references</p>
