PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The objectives refer to the description of the results of these diagnostic tools for elucidation of the outbreak.** **I suggest including details of the bacteriological isolation, if you do not want, better not to mention.**	
Minor REVISION comments	As mortality was monitored daily, suggest making a table to better demonstrate this date. The imagens are spared with elements of the necroscopic examination, such as wet feathers, cavity liquids, reflection of stainless material, plase exchange for slightly cleaner pictures. Put together imagens on an image board, six pictures. In the picture 3, the appointments b and c, can be reviewed for the lesion pointed out.	
Optional/General comments		

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)* I suggest insertion of the opinion of some ethics committee, however I believe that in practice the research does not run into ethical issues
