Manuscript Number:	Ms_AJRAVS_47876
Title of the Manuscript:	Human and animal Trypanosomiasis in Lambwe Valley Foci, Kenya– current situation and latent trypanotolerance
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The study is very relevant and well presented. The authors should, however, be consistent in language style. There are cases where English spellings and America spellings are used.</p> <p>The abstract seems to be a bit confusing, especially in the conclusion part. See comments in the manuscript.</p> <p>Again, it is difficult to adduce that the clinical symptoms though present in all the subjects for the study, blood smears were negative. Since, you cannot have symptoms without the inducing parasites. Authors need to provide cogent reasons for this anomaly.</p>	
Minor REVISION comments	See manuscript	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
