PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Despite being an interesting review, it is not innovative. I found several reviews with this theme. So I would like you to make it clearer what the differential of the review is compared to the existing ones. What does it have to grow into the scientific world?;</p> <p>In addition, the text is too long. I missed pictures, diagrams, flowcharts in the middle of the text. I think maybe this will make the review more interesting and catch the reader's attention. Some suggestions are: a table with more objective information about the activity of each plant, schemes demonstrating the action of each type of inhibitor and what clinical effect this generates, etc.;</p> <p>Be more objective in conclusion, I find it very broad;</p> <p>Finally, review English, punctuation and spacing</p>	
Minor REVISION comments		
Optional/General comments
