PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This study provides a baseline for the configuration of Automated Fingerprint Verification System (AFVS) in the face of changing weather and environmental conditions. Following are comments and suggestions: 1. Add structure of paper at the last paragraph of Introduction section. 2. Literature review is not sufficient. If possible, assign separate section for Literature Review and elaborate relevant studies. 3. The data are too limited. The authors should update more data to explore quality of research. 4. Results and Discussion section is too short. There is no justification of results which should be updated with relevant citations. 5. Limitations and future recommendation of the study should be added. 6. The new studies (citations) of recent five years research should be included in the paper. 7. The study lacks significant practical contributions.
