PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper entitled 'Performance Assessment of Principal Component Analysis and Kernel Principal Component Analysis using TOAM Database' is mainly based on face recognition analysis and algorithms. The abstract clearly specifies the aim of the authors, what has been done and what they propose. The database considered is adequate for the current purpose and so is the methodology. The results are presented in a nice manner and the discussion on the results is good to make a reader understand what has been done through this paper and how it is useful to the society. The conclusion could have been a bit more elaborated but certainly is not a drawback.	
Minor REVISION comments	The abstract would look more satisfactory if it is reduced by 2 or 3 lines.	
Optional/General comments	NONE	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
