PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I think that the authors have misunderstood because they fail to properly correct the document.</p> <p>There is too much confusion between the results concerning the characteristics of the study population (243) and the distribution of intestinal parasitic infections (29) according to the studied variables.</p> <p>In this new revision, we find references to non-existent table numbers (Table 8, Line 232) while the number of tables has been reduced to 4, ... and references to erroneous table numbers (ex: Line 209, table 3 instead of table 1).</p> <p>Calculation errors also persist (Table 2 headache, Frequency of eating Hawk food, etc.).</p> <p>I made my comments directly on the revised version 2</p> <p>So I simply advocate that this article be rejected to allow its authors to thoroughly review it from top to bottom.</p>
