PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**-Literature reviewed is rather insufficient. Principle information as protein requirement of tested specie or related one should be provided and discussed.** **-Experimental planning is in doubt. There were two factors tested in this study. I believe CRD is not appropriate statistical analysis, but factorial.** **-Feed intake should be discussed in feeding trial. This will provide whether or not palatability is a factor or not. Feeding at 5% with the assumption of all food was taken up by fish.**	
Minor REVISION comments	-Discussion should be related to important information of the experiment stated above. -Spelling error was found throughout the manuscript	
Optional/General comments		

PART 2:
