**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript deals with a case series, namely the use of minimally invasive or non-endoscopic thyroidectomy on seven patients and its advantages over conventional thyroidectomy. The article is very interesting, results are well written, and discussion properly and extensively described. Hence, I suggest the publication for this work.	
<u>Minor</u> REVISION comments	I point out only some minor revisions. In the abstract, please rephrase the statement as "Due to the rectification of difficulties and mistakes made in previous cases our incision length and procedure times WERE reduced". In Material Methods, please consider to write full name for FNAC.	
<u>Optional/General</u> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>  Yes, it is a case report. The authors stated that informed and written consent was taken from all the seven patients Approval from Ethics Committee should be required.
