#### **SDI Review Form 1.6**

Journal Name:	Asian Research Journal of Agriculture
Manuscript Number:	Ms_ARJA_46481
Title of the Manuscript:	THE STUDY OF AREN SUGAR PALM (Arenga pinnata MERR.) AS LIQUID ORGANIC FERTILIZER ON THE GROWTH AND RICE PRODUCTION
Type of the Article	

## **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novel ty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

#### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The application of organic fertilizers to soils improves their physical, chemical and biological properties, obtaining good plant responses. To maintain soil fertility and enable crops to reach maximum productivity, some practices are needed, such as the use of organic waste. The organic production system aims at the generation of ecologically sustainable, economically viable and socially just food, capable of integrating man to the environment. The adoption of this system of production has been growing, both in cultivated area and in number of producers and consumer market, although it still represents a small part of agriculture. The objective of this work was to present the benefits of organic fertilization. The use of Nira Aren as a liquid organic fertilizer gives a good influence on the growth and yield of rice crops, according to the potential yields of the mekongga varieties, especially in a time when strategies are pursued for sustainable agriculture and the possibility of improvement in the marketed values of these products within family farming. Congratulations to the authors!	
Minor REVISION comments	x	
Optional/General comments	x
