

SDI Review Form 1.6

Journal Name:	Asian Research Journal of Gynaecology and Obstetrics
Manuscript Number:	Ms_ARJGO_45252
Title of the Manuscript:	CORPUS LUTEAL CYST RUPTURE – AN IMPORTANT DIFFERENTIAL FOR ECTOPIC PREGNANCY
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is case report and generally has addressed management in a standard way. There are some typos and these have been indicated. The references need to conform to the standard guidelines- Vancouver style. For a case report there are too many references- if the editor is okay with this, no changes need to be made.	
Minor REVISION comments	Check the typos	
Optional/General comments	Acceptable –this is not a unique presentation. Clinical presentation of haemoperitoneum in women should include ectopic pregnancy and ruptured corpus luteal cyst as mentioned. Other rare cases are also see. Most cases may need laparoscopy; caution in employing MRI and CT as these expensive in investigations. A fall in Hb need not be waited to occur before intervention.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
