SDI Review Form 1.6

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_46298
Title of the Manuscript:	FIXED POINT OF NON-NEWTONIAN EXPANSION MAPPINGS ON NON-NEWTONIAN METRIC SPACES
Type of the Article	Research

General guideline for Peer Review process:

This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of '<u>lack of Novelty'</u>, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Numeration of results is not correct. Distinct results have the same number (3.2). No result 2.5, etc	
	Every metric space is a Hausdorff topological space, so most of convergence results in this paper are consequences of this fact (particularly lemma 2.14), and they are proved using the same methods, so proofs like the ones of Proposition 3.2 (both), lemma 3.5, theorem 3.6, theorem 3.7 and theorem 3.9 must be much shorter. Lemma 2.2 states the topological completeness so I recommend to write "topologically complete field".	
Minor REVISION comments		
Optional/General comments	It would be helpful if the authors states the topological properties of a non-Newtonian space	

PART 2:

		Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

Reviewer Details:

Name:	Juan Antonio Pérez
Department, University & Country	Universidad Autónoma de Zacatecas, México
