

SDI Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_40852
Title of the Manuscript:	Optimization of a brown rice and soybean based flour blends for domestic and industrial application
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript is scientifically sound. The experimental design is superb. The references are well cited but the journal name, volume/issues and page number should be italicized and uniform with respect to year of publication; few were bracketed and major ones were left un-bracketed.	
<u>Minor</u> REVISION comments	Table 4- solubility column does not have standard deviation values probably it is omitted. The proximate composition values in table 7 did not add up to 100 particularly for yellow corn and pineapple pomace. Please let the author cross check and make necessary correction. The protein value for full fat soybean is lower than carbohydrate. Is it reasonable? Please cross check your result. I suggest that if the author can also present the mixture models graphically (contour plots or 3D surface) it would add value and credence to the publication.	
<u>Optional/General</u> comments
