<p>1. Still there are the grammar mistakes in the manuscript which should be revised before publishing for example: "Since then, due the functional properties of SMA has enabled them" "Research show that Ni-Ti SMA parts with" "however they have high cost and are difficult to process."</p> <p>2. I recommend not to mention years in the introduction as it is not a review, just citation is enough.</p> <p>3. conclusion is good but too much points, I recommend to be just 3 to 4 points maximum.</p>
