PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>You cannot say, right from the start, that "progress of human civilization" without proving it. This is ridiculous. Now, if you really need to say this (and I think it's a bit foolish) then you have 2 choices: (1) prove it (which you can't) or (2) find such a quote by a noted humanist or scientist/engineer. Then you can state it.</p> <p>Where is Figure 1? You show a figure but don't identify it as Figure 1. Use a caption.</p>	
Minor REVISION comments	In Abstract: all of these are base of already... Change to "are based on" .	
Optional/General comments	<p>You only begin to explain UM at Lowell towards the end of this article. This makes your article weak. Perhaps your abstract should be less definitive about what you will show/prove and more general, survey like.</p> <p>Also, have you looked at the 2016 article? https://www.insidehighered.com/blogs/higher-ed-gamma/curricular-and-co-curricular</p>	

PART 2:
