**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>In Table 2, there are past cases found in 2018 and susceptibility to HD, Hemoparasites, Helminthiasis, Paratuberculosis, Coccidiosis, Fascioliasis, but, not the results of the blood parameters.</p> <ul style="list-style-type: none"> <li>• What are the values obtained after blood chemistry analysis?</li> <li>• It can be noted changes to the reference values?</li> <li>• Can be a tool in predicting Hardware disease?</li> <li>• For the three patients diagnosed and operated, there are blood tests results?</li> <li>• If the answer is affirmative were observed changes?</li> <li>• But between breeds or sex?</li> </ul>	
<b>Optional/General</b> comments	<p>Like the results of other papers, those obtained in the present paper an alarm sign for all farmers whose animals are left unattended on land, where the possibility of ingestion of indigestible products and more, dangerous, exist. It is good that the authors made a review of the cases diagnosed in 2018 because the number of the animals diagnosed is small, reason for that, no statistical interpretation can be made.</p>	

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
