PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <p>A good empirical research paper fit for publication by CJAST.</p> <p>However the ideas have been poorly articulated. Even the abstract is not comprehensible. The paper needs to be given to someone with a good command of the English language, so that he/she could read through the paper, correct all the language errors and render it more articulate.</p> <p>Secondly, the work should be divided into sub-sections to ease comprehension. Materials and methods should be sub-divided into data collection and data analysis. Results and Discussion should equally be sub-divided into different sub-sections following the objectives of the study, and not just written globally.</p> <p>Thirdly, the author(s) of the paper should sought for and cite the most recent papers (2012 to 2019) that fall in line with the subject matter of the study. Most of the papers cited in the paper date back to the 1970s, 1980s, 1990s, and early 2000s which is not good for a paper that will probably be published in early 2019.</p> <p>Last but not the least, a conclusion should be provided for the paper.</p> | |
| Minor REVISION comments | | |
| Optional/General comments | Good paper fit for publication. However the comments highlighted above should be imperatively integrated before the paper is considered for publication. | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
