

SDI Review Form 1.6

Journal Name:	European Journal of Medicinal Plants
Manuscript Number:	Ms_EJMP_45970
Title of the Manuscript:	Anti-Hyperglycemic and Anti-Hyperlipidemic Potentials of Methanol Leaf Extracts of Aframomum Melegueta and Piper Guineense
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>The present paper evaluates the effect of methanol leaf extracts of AM and PG on glycemic and lipid profiles of rats treated with alloxan. In addition, a regulatory letter issued by FDA indicates that methanol levels higher than 150 ppm could be considered unsafe for animal feed. In this way, I do not recommend this paper for publication. Even if allowed, there is no group to evaluate the isolated effects of methanol on glycemic and lipid profiles (L.87). Thus, the paper presents errors in its experimental design.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p> <p>Yes, a regulatory letter issued by FDA indicates that methanol levels higher than 150 ppm could be considered unsafe for animal feed.</p>
