SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Abstract For sensory quality the CF2 formulation recast standard procedures.... which standard methodology is it AACCC? plz indicate conclusion: 1st letter upper case has found greatest in all formulations.... recast hibicus.... wrong spelling Introduction preserves.....preservative Materials and methods (50 C)incorrect Table titles comes before table plz. Also footnotes are of smaller font size and your footnote has so much description. please reduce and move some to sentences. *CF- Cookie formulation.... unacceptable. your table is unnecessary wide. reduce size. please discuss your table very well and make mention of it in the discussions. Materials and methods:unacceptable. plz give it a new sub title like statistical evaluation There was unnecessary spacing of the formulas and their letter connotations. it's too much of redundancies since you're not the one who discovered the formula. reproduce them finely and neatly in a tabular form or shorter form not more than 1 page. because several researchers have used them and it becomes unnecessary to state them completely orbital shaker () for 2 hrs. ...what's the closed bracket for? REMI cooling centrifuge) ...remove vitamin c upper case at 20. C for color ...incorrect $C=(c \times V)/m$... use equation editor. Where, C= total content unnecessary spacing Anthocyanin's were extracted ...lie and centre NaNO2 solution ...incorrect five minutes, 10% AICI3incorrect time and formula expressions 95C for 90 min.....so many errors in writing time and degree? 95C for 90 min....wrong title.... change title was detected significantly increased in... incorrect grammar moisture content of regular cookies (2.5-3%)compared your answer to regular cookies but gave one reference? why/how? table must be in same page or next page once a reader is referred to it. e.g. table 2, 3 We have foundchange to "our findings showed Authors have to add recommendations Figure 1 and figure 2 should be plotted or placed side by side as figure 1 a & b. Too many tables.....Shrink tables 1,2 and place in a page and repeat same for 3 & 4. References need total overhaul...e. g ref 6 is abbreviated and Author having 1? why is ref 5 written in entirely different way? ref 13 was named twice? ref 14 incorrectly cited, give source. what is n doing in ref 15? why is doi in ref 2 separated? did you copy and pasted it? ref 3 has no journal title? in ref 1 and ref 4 you cited the journal volume and issue numbers differently? overall poor punctuations on the references. You must be consistent and use any of Refworks, endnote, mendeley or Ms word reference.</p>	
Optional/General comments
