

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_47003
Title of the Manuscript:	Effect of unripe plantain, soybean and ginger flour blends on the haematology, lipid profile and Blood Glucose of Streptozotocin induced Diabetic Wister Rats
New title of the Manuscript:	Treatment of Diabetic Condition in Streptozotocin induced Diabetic Wister Rats Using Food Blends From Unripe Plantain, Soybean and Ginger
Type of Article:	Original Research Paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I have carefully considered all possible ways to suggest the authors for improvements that can enable consideration for publication.</p> <p>However, the authors were not able to provide any convincing data at least in their revision.</p> <p>I agree to their reply that the results provided in the manuscript were truly the data from diabetic versus normal rats that unfortunately ended up being controversial to the so long known facts about diabetes that causes hyperlipidemia.</p> <p>However, the authors' controversy by their findings that diabetes causing low LDL-cholesterol levels and high HDL-cholesterol levels creates confusion to the existing facts.</p>
