

SDI Review Form 1.6

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_47332
Title of the Manuscript:	Mid shaft femoral fracture in a young Haemophilia A Patient - A Case Report
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There is no indication that informed consent was obtained for any diagnostic or treatment procedure described in the paper. Please specify whether informed consent was obtained from parent/s or guardian/s.	
Minor REVISION comments	There are few grammar and style issues that may be easily remedied. On p. 3, line 58-59 there is value of haematocrit expressed as per cent (18 %). This may simply reflect value (0.18) that is quite low because of prolonged bleeding or it may be a typo, as the patient's Factor VIII level is 18 %. Please correct or specify.	
Optional/General comments	There is no indication that informed consent was obtained for any diagnostic or treatment procedure described in the paper. As the patient is a minor, the issue is very sensitive, particularly in the light that multiple invasive procedures were carried out and the outcome was not benign with regard to restoration of the function of the affected limb and the quality of life for the patient.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details) <u>YES. There is no indication in the manuscript that all the procedures described in the manuscript were carried out after obtaining informed consent from the patient's parents or legal guardians.</u>
