

SDI Review Form 1.6

| | |
|--------------------------|--|
| Journal Name: | International Neuropsychiatric Disease Journal |
| Manuscript Number: | Ms_INDJ_47767 |
| Title of the Manuscript: | Are Carpal Tunnel Syndrome And Migraine Related? |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | Results: individuals with Carpal Tunnel syndrome were included in the control group (n = 30; 25% of this group). Those patients belong to the CTS group; they are not controls. Therefore, due to this methodological fault, all conclusions of this study are questionable. I suggest that Authors review their methodology and rewrite this manuscript. | |
| Minor REVISION comments | Different fonts had been used in this document. I suggest Authors use the same font. All commas in number must be changed to points. | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|--|---|
| Are there ethical issues in this manuscript? | <i>(If yes. Kindly please write down the ethical issues here in details)</i> | |
