

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|---|
| Journal Name: | International Research Journal of Pure and Applied Chemistry |
| Manuscript Number: | Ms_IRJPAC_46773 |
| Title of the Manuscript: | Field Evaluation of Newer Insecticides against Spotted pod borer [<i>Maruca vitrata</i> (Geyer)], on Rice fallow Blackgram in North Coastal Andhra Pradesh |
| Type of Article: | Original Research Article |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|---|---|
| <ol style="list-style-type: none"> 1. I suggest removal of Rice fallow on the title as it misleads readers. Let it be mentioned in m & m. 2. Data as observed was from only ONE SEASON (rabi 2017/2018). Such recommendation given by the author will not be good enough. At least it has to be from two seasons. Unless if one season data is acceptable by the Journal editorial board. 3. The sampling was wrong. Collecting data from 10 plants per replication (by implication one flower per plot is gross inadequate). 4. Present tables of results parameters, pod damage separate and yield also separate. | |
